Seattle • (206) 650-0141 • timothy.mosby@gmail.com • linkedin.com/in/timothymosby • github.com/timmytimmytimmytime

Senior Software Engineer

7+ years shipping native and cross-platform mobile products on **iOS** and **Android**, working in Swift, Kotlin, and React Native. Shipped Getty's Contributor app with **1M+ downloads** and a 4.7+ star rating, built with React Native. Led Branch SDK integration initiative on Twitch's iOS and Android app, from prototyping to stakeholder alignment and feature delivery. Patented a foundational multitouch gesture interaction, **cited 146+ times** industry-wide.

WORK EXPERIENCE

Twitch (via TEKsystems)

02/2026 – 07/2026

Lead Mobile Engineer, Marketing Tech • Contractor

Owned Branch SDK integration on **iOS** and **Android**, using agentic coding for end-to-end delivery

- Modernized to the latest Branch SDK versions in **Swift** and **Kotlin**, eliminated technical debt, added new features, rebuilt the data pipeline, and instrumented new event tracking
- Prototyped an **App Clip** solution in **SwiftUI** to restore deferred deep linking for iCloud+ users and drove stakeholder alignment via working demos
- Instrumented telemetry and monitoring for SDK integration on iOS and Android, closing a long-standing observability gap and enabling a live health dashboard
- Led attribution event data-quality remediation with Data Science, added unique identifiers for reliable joins, and restored integrity for performance marketing reports

Independent

Seattle • 02/2025 – 01/2026

Senior Software Engineer

Portfolio → timmytimmytimmytime.github.io

- Designed Flutter app with adaptive theming and responsive layout, using agentic coding
- Developed spatial prototypes using OpenCV and OpenXR, published working demos on GitHub

Getty Images – Mobile

Seattle • 01/2018 – 01/2025

Senior Software Engineer

Developed 9 mobile apps, REST APIs, backend, and internal systems

- Architected major Contributor app feature areas (enrollment, stats, releases), delivering cross-platform (**iOS/Android**) functionality using **React Native**, integrating **REST APIs**, and achieving 1M+ downloads with 4.7+ rating
- Rewrote Getty Images and iStock **Android** apps in **Kotlin** and **Jetpack Compose** using **MVVM** pattern, addressing long-term performance, stability and maintainability concerns
- Built Digital Model Releases app, handling iOS development with **SwiftUI**, delivered a usability-test-ready app in less than one month that replaced paper workflows
- Drove photo submissions growth by over 200% through mobile analytics and data-driven optimizations
- Integrated AI-powered content-moderation pipeline that quarantined unsafe imagery before human exposure, providing accuracy and cost analytics to help stakeholders assess viability

Getty Images – Frontend Web

Seattle • 05/2013 – 12/2017

Senior Software Engineer

Modernized e-commerce sites and CI/CD pipeline, drove mobile-first design

- Delivered a multi-year migration of GettyImages.com from .NET to **JavaScript**, performing code refactoring of major pages with zero critical incidents and 100% uptime
- Optimized Continuous Deployment for GettyImages.com, scaling release frequency by 300%
- Re-architected server-side routing to eliminate injection vulnerabilities and harden security
- Modernized high-traffic pages (Account, Purchase) using JavaScript, improving user experience and long-term maintainability
- Championed mobile-first web design, and delivered across all GettyImages.com pages

T-Mobile

Bellevue • 10/2012 – 05/2013

Software Developer

- Migrated financial data processing jobs to improve reliability and eliminate security vulnerabilities

LG Consulting

Redmond • 11/2011 – 05/2012

Software Developer

- Developed datacenter monitoring dashboard, displaying uptime, performance, and incident KPIs

Microsoft – Surface (PixelSense)

Redmond • 10/2005 – 08/2010

Software Development Engineer in Test

Led beta program, automated platform tests, created gesture patent

- Invented **gesture-input patent** “Virtual keyboard based activation and dismissal”, a widely cited innovation in touch interfaces
- Created automated multi-touch testing framework evolving from IR playback to procedural gesture generation with precise finger positioning/orientation, enabling continuous stress testing and shared test tools across the team
- Served as Quality Lead for the touch-input stack and UI navigation layer, performing deep debugging in customer environments and driving functional, performance, and security testing
- Led the Hardware Beta program, including remote monitoring, coordinating deployments, managing vendor team, and gathering customer feedback.

PATENTS & INNOVATION

US8619036B2 – Virtual keyboard based activation and dismissal

01/2013

Intuitive virtual keyboard layout technology that adapts position and orientation based on natural hand placement, positioning the home row directly beneath the user's fingertips

- **146+ forward citations** with broad impact across spatial computing, touch interfaces, and gesture recognition
- **Cited by major tech companies:** Apple, Amazon, Google, and Samsung
- Foundational gesture patent with **12+ years of enduring relevance**

EDUCATION

Certificate: Advanced Development ANSI C • University of Washington

06/2005

Comprehensive program covering programming fundamentals, coding practices, and development principles

SKILLS

Languages: Swift, Kotlin, JavaScript, Dart, C++, C#

Mobile: SwiftUI, Jetpack Compose, React Native, Flutter, iOS development, Android development

Technologies: REST APIs, Agentic Coding, ChatGPT, Claude, Xcode, Android Studio, CI/CD, Firebase, SQL

AR/VR: ARKit, ARCore, OpenXR, XR Hands, OpenCV

AWARDS

Getty Images Hackathon 1st Place • 2017

Solo-developed AR wall art implementation using ArgonJS for cross-platform mobile browsers, half a year before Apple ARKit and Google ARCore. Part of winning team with shared UX and ideation phase, delivering dual implementations: true spatial AR via ArgonJS and iOS native using Swift
